

Beach Renourishment

The Town of Hilton Head Island recognizes that its beaches are a vital asset to its residents and the Island's economy. As part of the Town's long-term strategy for beach restoration and maintenance, the Town began its 2006 \$16.6 million renourishment project.

The 2006 renourishment of the Atlantic oceanfront shoreline will be similar to the projects constructed in 1990 and 1997, with the exception of certain design refinements near the Marriott and along North Forest Beach. The entire period of project construction is expected to last from 5 to 6 months. Because the project is extremely large, construction operations must proceed around the clock and will, on average, move along the shoreline at a rate of about 200 to 300 feet per day.

For more information regarding this project, please visit our website at www.hiltonheadislandsc.gov.

NOTE: The beach nourishment areas and shoals are approximations. The order of beach renourishment will not alter, but start dates are subject to change.
